## **LandAmerica Information installs halFILE for Wireless Division**

---

[LandAmerica Information Company](#), Richmond, Virginia, recently installed halFILE into their Ft. Lauderdale office. halFILE is being used to store Starter Files for their wireless division which is responsible for Title Searches on wireless towers across the entire United States. Documents are faxed or e-mailed from field offices to Ft. Lauderdale where they are scanned or imported into halFILE and indexed by a variety of fields.

halFILE's flexible database structure was a key factor in LandAmerican's decision to use halFILE since property indices vary greatly in different locales. Also, halFILE's powerful search capabilities met the company's criteria for document retrieval.

We welcome LandAmerica Information to the halFILE family!
