hal Systems Announces Latest e.halFILE™ Client

Title Company adds Lee County, TX documents to Web site

Dallas, TX (September 1, 2004) - Located in Giddings, TX, Lee County Land and Abstract Company (LCLAC) has been an integral part of the business community in Lee County for over 100 years. Now, LCLAC is the latest title company to utilize advanced software solutions to offer its customers faster, more efficient service. Already a user of hal Systems' halFILE™ Document Management and Imaging software for creating their title plant, LCLAC has become the most recent installation of hal Systems' **e.halFILE™** e-commerce technology. e.halFILE allows registered users immediate and secure web access to Lee County recorded documents, giving them a multitude of search capabilities on any database field or combination of fields. Image print, download, and OCR functions are provided along with chain of title reports on the data. The e.COMMERCE module within e.halFILE allows LEE County Abstract to set up flexible billing plans on an individual user basis, accept credit card transactions through ECHO Electronic ClearingHouse, Inc, and accumulate transaction history for marketing analysis and billing summaries for their customers.

Lee County Land and Abstract Company is found on the Web at www.lclac.com, and the e.halFILE-based Lee County OnLine is at <http://secure.lclac.com>.

Mike Hathaway of TDMS, a halFILE reseller, implemented the e.halFILE/e-commerce site for Lee County Land and Abstract Company.

About e.halFILE

e.halFILE is a web-based product that provides support for accessing halFILE databases via the Internet. Documents which have been scanned and indexed using halFILE for Windows™ can be searched and viewed using most web browsers. Any document type supported by halFILE is immediately available over the Internet/Intranet, including scanned images, word processing documents, spreadsheets, graphics files, COLD/ERM text documents, etc. With e.halFILE the user signs onto the system over the Internet/Intranet, selects a database to search, enters the search criteria, and then views the images associated with the documents. e.halFILE also contains a billing component that supports credit card validation, invoicing, and transaction logging.

About hal Systems

hal Systems Corporation has been providing quality software solutions for thirty years and imaging solutions for the last sixteen years. halFILE is installed at over 350 companies nationwide in a variety of organizations including title, government, healthcare, insurance and financial institutions. On the Web: www.halfile.com

halFILE and e.halFILE are trademarks of hal Systems Corporation. All other trademarks and registered trademarks belong to their respective owners.
